**Description:**

AutoDutyPRO 4.x is an application used to create and manage employee work schedules at the Company through the Brigade level. This application is used to create specific rosters such as CQ, Staff Duty, and other rosters. AutoDutyPRO manages exemptions, training holiday's, duty rosters, and Unit Alpha Roster information. AutoDutyPRO monitors conflicts between different rosters and ensures that one duty roster does not overlap with another duty roster.

AutoDutyPRO 4.x is installed on Windows-based computers. CAC authenticated users access the application via the Windows Start Menu or a shortcut on the desktop. Data remains internal to the local computer, and all data remains internal to the local enclave.

**Facts:**

- This is a renewal for Certification 201210097.

**Restrictions:**

**POC:** netcom.hq.networthiness@mail.mil /(520)538-1199

This Certificate of Networthiness is based on a trusted standardized platform, configured per FDCC. All patches and updates will be provided by the host network administrator (NEC or DECC) in accordance with all technical directives, mandates, and IAVM. This Certificate of Networthiness is no longer valid should the assessed configuration be significantly altered. Per Army Cyber Command guidance, all operating environment will implement HBSS capabilities. Upon expiration of this Certificate of Networthiness, this application must be reassessed to ensure it is still compliant with the GNEC architecture and is still networthy. Should this software version be upgraded prior to this expiration, the new version must be evaluated for networthiness.
